

# WastePro Memorandum

---

**To:** Richard Gladstein (ENRD), Department of Justice

**From:** Jeff Karnes

**Date:** December 18, 2006

**Re:** Hazardous Waste Receipts into MSP 1992 through 1996

---

The purpose of this project is to produce a list of the generators that sent hazardous waste into the Marine Shale Processors Inc (MSP) plant in Amelia, LA, USEPA ID: LAD98105776. Attached to this memo is a report listing generators ranked by total waste shipments received between 1992 and to 1996.

The following reports listed below are available thus far in Adobe Acrobat .pdf format. These files can be viewed with the Acrobat reader available free on the internet. They cannot be modified. However, they can be printed and are searchable

MSP Waste Receipts - Top 500 Ranked: ranked by total waste from 1992 to 1996 (attached)  
MSP Waste Receipts - Top 500 Alphanumeric: listed by USEPA ID  
MSP Waste Receipts - Top 500 Annual: listed by USEPA ID with subtotals for individual years.

The process for developing this data is detailed in another memo, "Hazardous Waste Receipts into MSP 1992 through 1996: Report Development Process" from Jeff Karnes to Richard Gladstein (ENRD), Department of Justice, December 13, 2006, also attached.

The underlying data system contains all the information at the individual manifest level including waste codes. Future reports and/or queries can be developed to view this information. This could be useful in future discussions.
